5/6M has had another busy term. The students have had another 10 weeks of hard work and a little bit of fun with various lessons and activities. Thanks once again to Mrs Snell and Mrs Miller for their extra assistance within the classroom. It is greatly appreciated.

**English** – This term saw the formation of the school debating team. 5/6m were represented by Charlotte, Bailey, Eden, Rebecca and Chelsea. These 5 clever students honed their skills with the help and guidance of Miss Daley. Our public speaking competition was also held this Term and Charlotte, Bailey, Liam and Chelsea were chosen to compete for the Stage 3 places for the Zone Public Speaking.

**Maths** – We have been working diligently in maths this term. We have concentrated on improving our knowledge of Fractions and Decimals, Addition / Subtraction, Multiplication / Division and Mass. We have had some students take part in an extension maths group run by Mr Watson from the High School.

**Science** – Stage 3 have been working closely with the High School Science Faculty this term. The students have had the opportunity to work in the laboratory and complete experiments looking at ways of communication and energy. Mr Harris has also been working closely with a group of students each week completing extension work. They are Alisha, Liam, Charlotte, Eden and Bailey.

**Sport** – 5/6M students have been involved in a variety of sports this term. They have competed in LMG Soccer and AFL. Both the senior and junior teams made the finals of the soccer which were unfortunately washed out. As well as this, 5/6M has taken part in sports coaching clinics run by High School PE students under the supervision of Mr Riley and Miss Playford.
